

School of Nursing - Course Syllabus

COURSE INFORMATION

Course Title:	Stress & Strategies to Promote Wellbeing
Course Code:	NURS 180-107
Credits:	3
Term/Session:	2026W1
Course Dates:	September 8 – December 1, 2026
Class times:	Tuesdays (online) 2:00-3:30pm & Thursdays (asynchronous)
Class location:	Zoom link available on Canvas

INSTRUCTOR & COURSE TEAM INFORMATION

Course Lead: Rishika Selvakumar, MPH, BSc			
Email:	rishika.selvakumar@ubc.ca	Office Hours:	By appointment.
Teaching Assistant: Ohud Alotaibi			
Email:	ohud.alotaibi@ubc.ca	Office Hours:	By appointment.
The best way to reach our course team is by email. We typically reply to emails within 48 hours during the work week. If you do not hear back from us after 48 hours, please feel free to reach out again. Since this is a course about stress & coping, we think it is important to highlight that we try not to check emails during the evening or on weekends.			
Approach to teaching & learning in this course: ● Fostering belonging and connection is a central goal in this course. ● We strive to create an environment where every student feels valued. ● Authentic engagement is a core principle, we will bring our whole selves to the teaching and learning, and we invite all students to do the same and to come as you are. ● We prioritize active learning and reflection because we have seen that wrestling with concepts and problems directly is more effective than passive learning. ● By creating a supportive atmosphere, we hope to cultivate a classroom environment where students feel comfortable to explore and learn deeply, leading to personal growth and success. ● We're glad you've chosen NURS 180 & we're here to support your success!			

COURSE DESCRIPTION

This course will introduce students from any program of study to foundational knowledge related to stress, stressors, resilience, social support, and strategies to foster physical, mental, emotional, and spiritual health. This course is for any student interested in learning about managing and navigating the stressors of student life.

OVERVIEW: In this course, students are introduced to foundational knowledge related to stress, stressors, resilience, social support, and strategies to foster physical, mental, emotional, and spiritual health. Key concepts to be explored include the positive and negative aspects of stress, factors that contribute to stress, physiological and psychological responses to stress, and the various strategies to navigate and manage stress, including the role of social support and self-care. Students will have the opportunity to develop strategies to manage stress within the context of their current and future life.

LEARNING OUTCOMES

In this course, learners will:

- Examine stress from an historical, psychological, physiological, and sociological (or sociocultural) perspective.
- Explore the linkages between resilience and stress
- Describe the categories of social support
- Explain the role of social support in alleviating stress
- Identify common stressors experienced by university students
- Consider the health benefits, and explore the implications, of a variety of stress-reducing strategies
- Delineate the various categories of Self-Care
- Reflect on individual stressors experienced and typical responses
- Explore individual strategies to foster physical, mental, emotional, and spiritual health.

INCLUSION AND DIVERSITY

The School of Nursing commits to fostering a culture of inclusion and respect for diversity in all its activities. Relationships among students and faculty and the classroom environment are to uphold the principles of equity, respect, and inclusion and reflect UBC's [*Statement on Respectful Environment for Students, Faculty and Staff*](#) and <https://equity.ubc.ca>

We support the realization of these goals in this course and the importance of developing health professionals who understand the importance of navigating and negotiating differences and who foster the realization of health, wellness, equity and respect for all.

ACKNOWLEDGEMENT OF MUSQUEAM FIRST NATION PEOPLE & LAND

“UBC’s Point Grey Campus is located on the traditional, ancestral, unceded territory of the Musqueam People. The land it is situated on has always been a place of learning for the Musqueam people, who for millennia have passed on their culture, history, and traditions from one generation to the next on this site.” (Retrieved from: <https://indigenous.ubc.ca/>). UBC School of Nursing wishes to acknowledge the past history and present relationships with Musqueam people and the land as a way to honour and show respect to the Musqueam who have inhabited this land for many thousands of years, and to affirm our commitment to reconciliation in the light of the past and ongoing harms inflicted through colonization of Indigenous peoples and lands. To learn more about the Musqueam people, land, and culture, go to <https://www.musqueam.bc.ca/our-story>

ʔəy̓ tə ʃxʷqʷeləwən ct k̓ w s əy̓ em stəxʷs tə xʷməθkʷəy̓ əm ʔiʔ tə ñ a təməxʷs.
We are pleased to honour the Musqueam people and their land.

ANTI-RACISM ACKNOWLEDGEMENT

In alignment with [UBC’s stance on racism](#), the School of Nursing acknowledges that systemic racism ¹ affects all facets of society, including academic institutions, health care delivery, and health outcomes. As a School, we have a longstanding commitment to health equity, supported by our Canadian nursing code of ethics; this includes an obligation and responsibility to dismantle systemic and interpersonal racism in all contexts. The members of the School of Nursing commit to taking action based on the Truth and Reconciliation Commission’s² directions aimed at redressing an array of

¹ Systemic or structural racism (often used interchangeably with institutional racism) “refers to the totality of ways in which societies foster racial discrimination through mutually reinforcing systems of housing, education, employment, earnings, benefits, credit, media, health care, and criminal justice. These patterns and practices in turn reinforce discriminatory beliefs, values, and distribution of resources” (Bailey et al, 2017, p. 1453). The intersections between interpersonal and structural racism have important implications in the Canadian context (Brockie et al., 2021; Kétéskwēw Dion Stout et al., 2021; Johansen et al., 2021; Public Health Agency of Canada, 2020, 2021).

² Truth and Reconciliation Commission of Canada. Honouring the Truth, Reconciling for the Future: Summary of the Final Report of the Truth and Reconciliation Commission of Canada. Available at: http://www.trc.ca/assets/pdf/Honouring_the_Truth_Reconciling_for_the_Future_July_23_2015.pdf.

historical and ongoing colonial harms affecting Indigenous peoples, and the ongoing calls to disrupt the harms of systemic racism on Black people, and People of Color. Anti-racism and anti-Indigenous racism action in the School of Nursing are united through UBC's stance on racism. Within the context of UBC's commitment to Equity, Diversity and Inclusion (<https://equity.ubc.ca/about/inclusion-action-plan/>), we strive to create an environment where people of all identities are respected and encouraged to participate in dialogue and learning.

COURSE STRUCTURE

This course is delivered in a Flexible/Blended Learning approach.

Flexible (sometimes referred to as blended) learning is an approach that combines the expertise of the instructor, the nature and requirements of the discipline, and the way the material is taught, with appropriate technology in order to enhance student-learning outcomes. Such innovative techniques facilitate an increase in student engagement in classroom-based and/or online activities, provide opportunities to introduce evidence-based knowledge and practice to help foster higher order learning and skill development, enrich the quality of learning materials through technology, and increase the frequency and impact of assessment. If you would like more information about Flexible Learning at UBC please see: <https://flexible.learning.ubc.ca/>

COURSE MATERIALS

Textbook & Other Required Learning Resources:

Malette, N. (2020). It's All Good (Unless It's Not): Mental health tips & strategies for your undergrad years. UBC Press, On Campus.

**This book is available to [download as a free PDF](#) or you can purchase a paperback copy from UBC Bookstore for ~\$15.*

Other Readings and Resources: Information about additional readings and resources such as journal articles, videos, podcasts, etc. is provided in the topical outline below and on Canvas.

COPYRIGHT

All materials of this course (course handouts, lecture slides, assessments, course readings, etc.) are the intellectual property of the Course Instructor or licensed to be used in this course by the copyright owner. Redistribution of these materials by any means without permission of the copyright holder(s) constitutes a breach of copyright and may lead to academic discipline.

Online Learning/Course Support Resources

CANVAS is UBC's learning management system (LMS). This system has a variety of functions, which enable the administration of online classroom activities and facilitate instructor – student and student-student communication. In NURS 180 our use of Canvas includes but is not limited to the following functions:

- Post announcements
- Share course materials
- Integrate multimedia resources
- Complete/submit assignments

The Canvas site is available at <https://about.canvas.ubc.ca/>

COURSE OVERVIEW:

WEEK	MODULE
Week 1	Course Introduction to Mental Health, Wellness, and Resilience
Week 2	Academic Wellbeing and Student Stress
Week 3	The Domains of Self-Care and Navigating Change
Week 4	The Physiology of Stress
Week 5	Physical Wellness
Week 6	Psychology of Stress
Week 7	Identity and Diversity
Week 8	Productivity, Time & Resource Management
Week 9	Cognitive Restructuring & Reframing
Week 10	Reading Break
Week 11	Spirituality, Nature, & Health
Week 12	Creative Expression & Wellbeing
Week 13	Course Review & Final Wrap-Up

DETAILED SCHEDULE & READINGS:

Date	Topic	Readings (Required and Optional) – <i>Please consult Canvas for details</i>
Week 1 – Course Introduction to Mental Health, Wellness, and Resilience		
Tues, Sept 8	<u>Asynchronous</u> Course Introduction (Lecture video posted on Canvas)	• Introduction (Malette) – Knowing You're Not Alone • Chapter 1 (Malette) – Making the Transition to University • What is Stress Resilience and Can It Be Learned? (Kaufman, 2018) • Managing stress and building resilience • Thriving or just surviving? (Richardson, King, Garrett, & Wrench, 2012) • Mental health challenges, treatment experiences, and care needs of post-secondary students: a cross sectional mixed-methods study Moghimi et al., (2023)
Thurs, Sept.10	<u>Asynchronous</u> Thriving or Surviving See Canvas for activity & guidelines. • Continue with Assigned readings. • Self-Care Assessment	

Week 2 – Academic Wellbeing and Student Stress		
Tues, Sept. 15	Academic Integrity and Managing Student stressors	• Chapter 4 (Malette) – Meeting Academic Hurdles Head On • Growth Mindset vs Fixed Mindset (2025) • Thrive 5 – UBC wellbeing Thrive UBC
Thurs, Sept.17	<u>Asynchronous</u> Managing Student Specific stressors See Canvas for activity & guidelines. • Continue with Assigned readings. • Creating Your Own Stress Management Plan • The importance of social connections and support	
Week 3 – The Domains of Self-Care and Navigating Change		
Tue, Sept. 22	The Domains of Self-Care, Creating your Self-care plan, social support • Wellness, stress & resilience	• Six domains of self-care: Attending to the whole person (Butler et al., 2019) • First Nations Perspective on Health and Wellness - First Nations Health Authority • Social Support and Stress Reduction (Lumen) • Understanding the different types of social support. (Stupinski, 2020)
Thurs, Sept. 24	<u>Asynchronous</u> The Domains of Self-Care & social Support See Canvas for activity & guidelines. • Continue with Assigned readings. • Reflecting on your current self-care	
Week 4 - The Physiology of Stress		

Tue, Sept. 29	The Physiology of Stress • The impact of stress on our bodies • Stress & Sleep	• APA (2018). Stress effects on the body. • APA (2013). Stress and sleep. • Six tips for better sleep, Matt Walker, Sleeping with Science, aTED series https://www.youtube.com/watch?v=t0kACis_dJE
Thurs, Oct 1	<u>Asynchronous</u> The Physiology of Stress See Canvas for activity & guidelines • Continue with Assigned readings.	
Week 5 - Physical Wellness		
Tues, Oct. 6	<u>Asynchronous</u> Physical Activity, Nutrition and Stress (Lecture Video Posted on Canvas)	• Decolonizing Our Diet: Sioux Chef (Al-Sulaiman, 2018) • Effects of college student’s participation in physical activity class on stress (Barney et al., 2014) • Food and Mood: How do diet and nutrition affect mental wellbeing? (Firth et al., 2020) • Here’s How the ‘Health at Every Size’ Movement Made Me a Better Trainer (Green, 2020) • Boost your mood with food: Diets rich in antioxidants and healthy fats support brain health (Lancaster, 2023)
Thurs, Oct. 8	<u>Asynchronous</u> Physical Exercise, Nutrition and Stress. See Canvas for activity & discussion guidelines • Continue with assigned readings.	
Week 6 – Psychology of Stress		

Tue, Oct. 13	• Understanding Mental Health & Recognizing the Signs of Mental Illness • Reframing stress and happiness • Help-seeking	• Pages 1-7 (Malette): Introduction (author’s story and reasons for writing this book) • Chapter 3 (Malette): Understanding Mental Health • Chapter 8 (Malette): Recognizing signs of Mental Illness • Stop the Stigma of Mental Health Issues and Disorders (Belanger, 2020) • Take a Mental Health Self-Check assessment using the Mental Health Continuum Model (Mental Health Commission of Canada) • Visit UBC's Thrive site to learn about mental health through videos, infographics and interactive resources. <u>MEDIA</u> Prior to class watch: Past UBC President Santa Ono Ted Talk Tackling the Mental Health crisis in our youth, 2017.
Thurs, Oct. 15	<u>Asynchronous</u> Stress and Mental Health See Canvas for activity & discussion guidelines • Continue with Assigned readings.	
Week 7 – Identity and Diversity		
Tues, Oct. 20	• Our comparing minds, imposter syndrome • Valuing and supporting diversity	• Chapter 2 (Malette): Valuing and Supporting Diversity • Understanding the Minority Stress Model (Caraballo, 2019) • The Negative Impacts of Microaggressions on Indigenous and Other Racialized People (Efimoff, 2021) • Microaggressions Can Take a Psychological Toll on Students of Color <u>Supplemental readings:</u> • Indigenous Health, CMA CMA (2025) • In Plain Sight report, BC’s Office of the Human Rights Commissioner, 2020 • Holistic Health of Two Spirit People in Canada: A Call for Nursing Action, (Dykhuizen et al., 2024)

Thurs, Oct. 22	<u>Asynchronous</u> Valuing and supporting diversity Psychology of Stress – Part 2 See Canvas for activity & discussion guidelines Continue with Assigned readings.	
Week 8 - Productivity, Time & Resource Management		
Tue, Oct. 27	Time & Resource Management	Chapter 5 (Malette): Making Time for Friends and Extracurriculars Chapter 6 (Malette): Going Out & Staying In Chapter 7 (Malette): Doing it All and Still Having Time for You Media: How I manage my time – 10 time management tricks Rules for a better work -life balance: The Way We Work (TED, 2021) Maximize Productivity with these Time Management Tools (Dr. Cal Newport & Dr. Andrew Huberman) Time Management (UBC)
Thurs, Oct. 29	<u>Asynchronous</u> Time and Resource Management See Canvas for activity & discussion guidelines Continue with Assigned readings	
Week 9 - Cognitive Restructuring & Reframing		

Tues, Nov. 3	Cognitive Restructuring/ Reframing	• How to Reframe Stressful Situations (Scott, 2025) • How to change negative thinking with cognitive restructuring (Stanborough, 2023) • Cognitive-Behavioral Coping Strategies. (Tull, 2021)
Thurs, Nov. 5	<u>Asynchronous</u> Cognitive Restructuring/Reframing See Canvas for activity & guidelines • Continue with Assigned readings • WOOP!	
Week 10 - Reading break		
Tue, Nov. 10	No Class – Reading Break	
Thurs, Nov. 12	<u>Asynchronous</u> Work on Creative Project	
Week 11 – Spirituality, Nature, & Health		
Tues, Nov. 17	Spirituality, Nature and Health	Spirituality: • Spirituality and stress: Is there a connection? https://psychcentral.com/stress/spirituality-and-stress-relief • The Science of Spirituality and how it can change your brain • https://www.youtube.com/watch?v=DkunRFYxOzA • The Power of Vulnerability – Brene Brown https://www.youtube.com/watch?v=iCvmsMzIF7o • Vulnerability is your superpower (Wynter, 2021) https://www.youtube.com/watch?v=JX4kFRgTuaw Nature:

		• Ecopsychology: How immersion in nature benefits your health (Robbins, 2020) • Land and nature as sources of health and resilience among Indigenous youth in an urban Canadian context (Hatala et al., 2020)
Thurs, Nov. 19	<u>Asynchronous</u> Spirituality, Nature and Health • See Canvas for activity guidelines	
Week 12 – Creative Expression & Wellbeing		
Tues, Nov. 24	Creative Expression	Creative expression: • Art and Indigenous Health and Well-Being: The impact of art on determinants of Indigenous Health (Stahl, Bovin & de Leeuw, NCCIH, 2025) • Canvas of Calm: A Pilot Study on Art-Based Interventions for Academic Stress Management in Higher Education(Surana & Datta, 2025) • Emotional benefits of brief creative movement and art interventions.)Zimmermann & Mangelsdorf, 2020) • Mood and Music: How to Make a Playlist for Mood Management Using the Iso Principle. (2019)
Thurs, Nov. 26	<u>Asynchronous</u> Creative Expression • See Canvas for activity guidelines	
Week 13 – Wrap up		
Tues, Dec. 1	Course Review & Wrap-up Wrapping up & Final Course Reflections	Conclusion (Malette, 2020) Keeping a Healthy Mind, pp118-120.
No Final Exam – put the strategies you’ve developed to use during finals 😊		

ASSESSMENT SUMMARY

Course Assessment Plan:		
Assignment	% of Grade	Due Date
Attendance and Participation Assigned weekly for attendance and participation on Tuesday in-person lectures from after the add/drop deadline (Sept. 21) to the last day of scheduled class.	18%	Weekly
Asynchronous reflection activities: • Weekly engagement activities x5 • Discussion posts and responses x3 • Final Course Reflection x1	25% 17% 5%	Each week there is an asynchronous module with assignment(s). Please see Canvas for details and due dates
Self-Care Strategy Paper	20%	Full details and due dates will be shared in Canvas 4 weeks in advance
Self-Care Creative Project	15%	Full details and due dates will be shared in Canvas 4 weeks in advance
Total	100%	

Please note, evaluation is based on [UBC's Grading Practices](#) and the School of Nursing's [Grade Assignment Guidelines](#).

DETAILS OF INDIVIDUAL ASSESSMENTS:

In-class Attendance and Engagement (18% - 2 marks per class)
Both individual and collective success in this class relies on everyone engaging with the concepts, practices, and reflections that make up the core work of this experiential course. Engagement and participation are crucial, marks are allocated for consistent, respectful, and thoughtful engagement with the course and with your instructors and peers. Starting Week 3 (after add/drop period), you can earn up to 18 attendance and

engagement marks (2 marks per class) by attending **for the whole class** and completing the in-class activities, discussions, etc. each week. Activities may include polls, brief reflections, breakout room activities, chat contributions, worksheets, or other participation exercises, marked for completion. There is 1 “free pass” built in (i.e., you can miss one class without losing any engagement marks). If you miss more than one synchronous class, you may make up a maximum of an additional one (1) class by sending a request before class by email & submitting a makeup assignment within a week of this missed class (unless otherwise agreed upon by the instructor).

Each class covers substantial content and involves applied learning. It is important that students make every effort to attend classes. If you know ahead of time that you will not be able to attend a specific lecture, please consider seeking an academic concession through your department to have that absence waived.

Asynchronous Reflection Activities (47% - marks vary per assignment)

Engagement: There are five engagement activities. Most often the activity is a written reflection on content and discussions from the week. **See Canvas for more details.**

Discussion (5 marks each): There are three discussion forums spaced throughout the term. These discussions will ask you to reflect on readings or other assigned materials (videos, podcasts, etc.), course discussions, and asynchronous activities. Guidelines and prompts for each discussion forum will be provided on Canvas; please carefully review the due dates. **See Canvas for more details.**

Final Course Reflection: An opportunity to share your takeaways and what you will be bringing away from the course.

Self-Care Strategy Paper (20%)

Students are encouraged to select a wellness strategy that is realistic, accessible, and safe to implement consistently over a two-week period. The strategy should be practiced regularly enough to allow meaningful reflection on its impact, benefits, and challenges. Students should keep brief notes throughout the two weeks to support their reflection and discussion in the paper.

Self-Care Creative Project (15%)

The purpose of this assignment is to encourage creative exploration of wellbeing and self-care. Students are invited to represent what wellbeing looks like for them in a format of their choosing and to reflect on their experiences and learning throughout the course. Projects will be assessed on thoughtfulness, originality, connection to course concepts, and quality of reflection, rather than artistic or technical ability.

REQUESTS FOR ACADEMIC CONCESSION

THE UNIVERSITY
OF BRITISH COLUMBIA

School of Nursing
Faculty of Applied Science

UBC has an [Academic Concessions policy](#) that explains the circumstances for which students may qualify for concession. If students must miss an in-person class, they may request a concession. Students should speak with their home academic advising office to discuss concession options. In this course, options for late submissions/extensions for in-term work include:

Late Submission of Assignments: Students are responsible to make every effort to complete assignments on time. Assignment submissions are expected on the due dates noted in the syllabus and in Canvas.

Standard Deadline and Penalties: Assignments submitted late will incur a 5% deduction per day (weekends included) for up to 48 hours past the due date. Beyond 48 hours, the assignment will receive a grade of 0.

Extension Requests: A planned extension of up to 48 hours may be granted for all assignments. To request an extension, email the teaching team at least 48 hours before the due date. No explanation is needed, and no marks will be deducted if granted.

As per [UBC's Concession policy](#), for students managing missed term-end submission deadlines or formal examinations (i.e. final exams), "the student's home academic advising office must be involved in decision on academic concessions."

UNIVERSITY RESOURCES

UBC provides resources to support student learning and to maintain healthy lifestyles but recognizes that sometimes crises arise and so there are additional resources to access including those for survivors of sexual violence. UBC values respect for the person and ideas of all members of the academic community. Harassment and discrimination are not tolerated nor is suppression of academic freedom. UBC provides appropriate accommodation for students with disabilities and for religious observances. UBC values academic honesty and students are expected to acknowledge the ideas generated by others and to uphold the highest academic standards in all of their actions.

Details of the policies and how to access support are available on [the UBC Senate website](#).

ACADEMIC ACCOMMODATION(S)

The School of Nursing respects UBC's commitment to supporting students. UBC [Centre for Accessibility](#) "provides leadership on issues of accessibility for people with disabilities at UBC Vancouver, working in partnership with faculties to foster inclusive learning, living and working environments for students, faculty and staff." [Policy LR7, Accommodation for Students with Disabilities](#) outlines the principles, responsibilities and processes for accommodation for students with disabilities.

As needed, please refer to the [Centre for Accessibility website](#) for information on how to meet with an advisor and how to request accommodation. *“After your appointment with the Centre for Accessibility, your Accessibility Advisor will give you a letter outlining your academic accommodations. Present this to each of your instructors at the beginning of the term.”*

ACADEMIC INTEGRITY

The academic enterprise is founded on honesty, civility, and integrity. As members of this enterprise, all students are expected to know, understand, and follow the codes of conduct regarding academic integrity. At the most basic level, this means submitting only original work done by you and acknowledging all sources of information or ideas and attributing them to others as required. Submission of own work is a necessary component of all course learning activities that students engage in regardless of format (e.g. written, verbal presentations, online discussion forums). This also means you should not cheat, copy, or mislead others about what is your work. Violations of academic integrity (i.e., misconduct) lead to the breakdown of the academic enterprise, and therefore serious consequences arise and harsh sanctions are imposed. For example, incidences of plagiarism or cheating may result in a mark of zero on the assignment and more serious consequences may apply if the matter is referred to the President's Advisory Committee on Student Discipline. Careful records are kept in order to monitor and prevent recurrences. **See the following links for relevant UBC policies:**

- [Academic Honesty and Standards](#)
- [UBC Academic Misconduct](#)
- [UBC School of Nursing Policy on Plagiarism](#)

Regrading of Assignments: To maintain fairness and consistency across the cohort, assignment grades are considered final and are not subject to regrading. Students are encouraged to review the feedback provided and may reach out if clarification would support their learning in future assignments.

Generative Artificial Intelligence (AI)

At UBC, the Academic Integrity Office of the Provost & Vice-President Academic (<https://academicintegrity.ubc.ca/genai/>) provides resources for students and faculty to consider with regard to generative artificial intelligence (AI). As stated on the UBC Academic Integrity website: UBC is taking a measured and balanced approach to the use of generative AI tools in teaching and learning, as these tools present both opportunities and risks. Generative AI tools can have the potential to enrich learning, for example by supporting idea generation, studying, or writing with proper acknowledgement. Such tools can also, however, be used in ways that are detrimental to skills development, and some uses may be considered academic misconduct. It is also important to pay attention to other risks and ethical considerations, including copyright and intellectual property, accessibility, bias, and harmful outputs, to name a few (<https://academicintegrity.ubc.ca/genai/>).

THE UNIVERSITY
OF BRITISH COLUMBIA

School of Nursing
Faculty of Applied Science

A key expectation of academic integrity for students is completing their own work. To meet the learning outcomes of this course you need to be able to complete all of the assignments by demonstrating your ability to apply course concepts on your own. You must include a GenAI declaration statement at the end of each assignment.

Students should note that discussions about generative AI at UBC are evolving and updates can be anticipated within the context of your course. If you have further questions about the use of AI in your coursework, please consult your instructor.

<https://academicintegrity.ubc.ca/regulation-process/academic-misconduct/>

USE OF PERSONAL TECHNOLOGY

Personal technology devices (e.g. laptops, smartphones, etc.) and an internet connection will be required for participation in some activities in class.

Audio and/or video recording and photographs (screen shots) are not permitted without expressed permission from the course lead, guest speakers, or peers.

Personal technology devices (e.g. laptops, smartphones, etc.) may be used in the classroom to facilitate your learning. If you are using these devices during class time it is expected that you will do so in a professional and respectful manner so as to not disrupt the learning environment. Students are required to be familiar with specific health authority policies related to the use of personal technology.

Please see the [UBC School of Nursing policy on Use of Digital Technology](#).

COURSE AND INSTRUCTOR EVALUATION

Course and Teacher Effectiveness Evaluations are a vital component of ongoing course and faculty development in the School of Nursing. Student input regarding the strengths and areas for improvement is reviewed and utilized in making decisions and planning for change. Collecting this input allows the School of Nursing to comply with institutional academic policy, make decisions related to curriculum and course planning, and incorporate student input regarding teaching effectiveness as a core component of teaching faculty promotion and tenure. Such evaluations offer confidential feedback for the development of the course, the course leader and the clinical educator. Please refer to the UBC Senate policy on Student Evaluation of Teaching: <http://teacheval.ubc.ca/senate-policy/>

Please see also the FAQ at: <http://teacheval.ubc.ca/frequently-asked-questions/>

To ensure we have received your feedback, you can go directly to this link and login with your CWL: <https://seot.ubc.ca/evaluations>

THE UNIVERSITY
OF BRITISH COLUMBIA

School of Nursing
Faculty of Applied Science

Course and Instructor Evaluations are completed through Canvas. As you approach the end of the term, your Canvas Dashboard will display an announcement indicating that the Term Evaluations are open. It will also provide the link to where the evaluations are to be submitted. All responses are confidential. Thank you for taking the time to complete these evaluations.

Select what you are evaluating:

- You will be presented with the list of courses and instructors that you are being asked to evaluate.
- Select the appropriate item to evaluate.

Complete the Online evaluation Form and Submit It:

- Fill in the online questionnaire and click submit to complete your evaluation
- Then select the next item for evaluation and repeat

Evaluations open and close based on a schedule set by the UBC:

- We are required to open the evaluation before the course ends and close the evaluation before the start of exams. We are unable to extend the evaluation period to include the exam period.
- You will receive regular reminders from evaluations@nursing.ubc.ca until you have submitted your evaluations. Additional instructions are provided in each email.

We look forward to your evaluation responses and encourage you to participate as we value your feedback.
